

Mr. Briggs et al filed for this petition (RM-10352) just after the ARRL revised the voluntary 160M bandplan. They evidently felt that it would not work and filed for this petition. The results of the ARRL bandplan are clear. The bandplan is currently being observed and with a long standing amateur radio practice is self policing. I request not acting on this petition at the present time. Let's give the ARRL voluntary bandplan a chance to work.
